

Rule 1 For English Learning Success

Remember Phrases, Not Words

Download The Audio Below

My name is A.J. Hoge. I live in San Francisco, USA. I am an English teacher. I have a Masters degree in Teaching English. I enjoy travel, SCUBA diving, motorcycle riding, movies, and learning Spanish.

I will teach you a new method for learning. I will teach you how to study– to speak English faster and more easily.

Your First English Learning Suggestion

Imagine speaking English automatically... without thinking. The words come out of your mouth easily, and fast. You understand instantly.

To do this, you must change the way you study English. Your first action is to stop studying English words. What?

Stop studying English words.

That's right, do not memorize words. Native speakers do not learn English by remembering single words. Native speakers learn phrases.

Phrases are GROUPS of words that naturally go together.

"I am so proud of you Mr Hoge!!!! You are an excellent teacher with power and infectiousnessyou helped me improve my accent !!!!! Thank You For All!!!"

Elena Mwrou

Learn English 4x Faster

Research by Dr. James Asher proves that learning with phrases is 4-5 times faster than studying individual words. 4-5 Times Faster.

Also, students who learn phrases have much better grammar.

RULE 1: Study Phrases, Not Individual Words

Never study a single, individual word. Never.

When you find a new word, always write down The Phrase it is in. Always.
When you review, always review all of the phrase,.. not the word.

Collect phrases.

Your speaking and grammar will improve 4-5 times faster. Always write the complete phrase.

Never again study a single word. Never write a single word in your notebook,

Learn Phrases Only.

I look forward to helping you improve your English!

Have a great day,

A.J. Hoge

Director, Effortless English LLC

PS: Today's Homework

1. Listen To The Audio of This Rule Several Times

- Listen to the audio AND read the text at the same time. Do this 5 times.
- Listen only to the audio, without reading the text. Do this 5 times.

2. Make a Phrase Notebook.

Collect and Review Phrases Always. Never write only a single word, always save the entire phrase or sentence. Always review the entire phrase or sentence.

3. Get a Dictionary of Idioms and Phrases. This will help you learn phrases.

"I've been working the way you suggested listening to the lessons. I have gained more fluency when speaking and self-confidence. As a result, I was able to get a job as an interpreter of the English Language. Thank you very much."

Victor Escobedo, Venezuela
